

## Cardinor (DMF Grade )

**1. Why a doctor should prescribe our Cardinor instead of Other selective Beta 1 blocker (Anchor, Bisacor, Bislol & Tenobis)?**

**Ans:** Our Cardinor is DMF Grade Bisoprolol so Cardinor is more risk free than conventional Bisoprolol due to contain minimum impurity.

**2. Why a doctor's should prescribe our Cardinor instead of conventional Beta Blocker (Adlock, Indevar, Propranolon)?**

**Ans:**

- Cardinor is 19.6 Time more selectivity to beta 1 receptor
- Optimum 24 hours BP Control round the clock with devoid of following side effects like -

- Bronchial abstraction
- Metabolic imbalance
- Sexual Dysfunction
- Sleep Disturbances.

**\*\*\* Why a doctor's should prescribe our Cardinor instead of Calcium channel blocker ( Amdocal, Amlopin)?**

**Ans:** A doctor prescribe our Cardinor instead of Calcium channel blocker because :

- Cardinor Two-way control of BP round the clock
- Optimum 24 hours BP Control round the clock
- Doesn't Causes Peripheral Edema
- Safe for long term use.

**\*\*\* Why a doctor's should prescribe our cardinor instead of ARB ( Angilock, Osartil ) / ACE inhibitor ( Ramoril, Ramace, Acecard)?**

**Ans:** A doctor should prescribe our cardinor instead of ARB because :

- Control Cardiac Output along with Renin Angiotensin Aldosterone System (RAAS)

- <li>Optimum 24 hours BP Control round the clock&nbsp;</li>
  - <li>Doesn't causes Dry Cough & Angioedema.</li>
  - <li>Doesn't causes Sexual Dysfunction & Sleep Disturbances.</li>
- </ul>
