

## **Paincare (DMF Grade)**

**\*\*\* Why a doctor should prescribe Paincare instead of other Naproxen and Esomeprazole Combination (Naprosyn-plus (RD), Neso (ATP), Dinovo (BXM), Solivo (HTL) )?**

**Ans:**

Our Paincare is DMF grade so it is more risk free than conventional Naproxen and Esomeprazole Combination due to contain minimum impurity.

**\*\*\* Why a doctor should prescribe Paincare instead of Prescribing Naproxen & Esomeprazole alone?**

**Ans:**

- Along with pain reduction also minimizes hyperacidity
- A cardiac friendly NSAID therapy with desired gastro protection
- Least or no chance of GI risk
- Safe for long term use (up to 1 year)
- Reduces the burden of taking extra PPI
- Ensures patients compliance

**\*\*\* Why a doctor should prescribe Paincare instead of Diclofenac (Diclofen (OPL), Voltalin (NVR))?**

**Ans:**

- Least or no chance of GI risk
- Best cardiac friendly NSAIDs ever
- Safe for Long Term Use

**\*\*\* Why a doctor should prescribe Paincare instead of Indometacin (Indomet (OPL), Reumacap (ATP))?**

**Ans:**

- Least or no chance of GI risk
- Best cardiac friendly NSAIDs ever
- Safe for Long Term Use

**\*\*\* Why a doctor should prescribe Paincare instead of Ibuprofen (Flamex (ACI), Inflamm (Sanofi))?**

**Ans:**

- <li>Least or no chance of GI risk</li>
- <li>Best cardiac friendly NSAIDs ever</li>
- <li>Safe for Long Term Use</li>
