

Cardinor (DMF Grade)

1. Why a doctor should prescribe our Cardinor instead of Other selective Beta 1 blocker (Anchor, Bisacor, Bislol & Tenobis)?

Ans: Our Cardinor is DMF Grade Bisoprolol so Cardinor is more risk free than conventional Bisoprolol due to contain minimum impurity.

2. Why a doctor's should prescribe our Cardinor instead of conventional Beta Blocker (Adlock, Indevar, Propranolon)?

Ans:

- Cardinor is 19.6 Time more selectivity to beta 1 receptor
- Optimum 24 hours BP Control round the clock with devoid of following side effects like -

- Bronchial abstraction
- Metabolic imbalance
- Sexual Dysfunction
- Sleep Disturbances.

***** Why a doctor's should prescribe our Cardinor instead of Calcium channel blocker (Amdocal, Amlopin)?**

Ans: A doctor prescribe our Cardinor instead of Calcium channel blocker because :

- Cardinor Two-way control of BP round the clock
- Optimum 24 hours BP Control round the clock
- Doesn't Causes Peripheral Edema
- Safe for long term use.

***** Why a doctor's should prescribe our cardinor instead of ARB (Angilock, Osartil) / ACE inhibitor (Ramoril, Ramace, Acecard)?**

Ans: A doctor should prescribe our cardinor instead of ARB because :

- Control Cardiac Output along with Renin Angiotensin Aldosterone System (RAAS)

- Optimum 24 hours BP Control round the clock
 - Doesn't causes Dry Cough & Angioedema.
 - Doesn't causes Sexual Dysfunction & Sleep Disturbances.
-
