**\*\*\* Why a doctor's should prescribe our Azilab instead of Cefixime (Cef-3, Emixcef)?**

**Ans:** A doctor should prescribe our Azilab instead of cefixime because :

Cefixime	Azilab
Cell wall synthesis inhibitor & has no effects against atypical bacteria	Active against Atypical bacteria
Beta-Lactamase unstable, & So it causes resistance	No effects on Beta-Lactamase, So no chance of treatment failure
Does inconvenient & (b.i.d) & longer treatment duration & (7-10 days)	Does convenient & (once daily) & short treatment duration
High treatment cost (70*7 = 490 Tk.)	Cost effective & (50*3 = 150 Tk.)
